

**TB**  
**APHA Briefing Note 3/11/2015**

We urge all cattle farmers to be aware of the launch of a TB Information Hub and a biosecurity five point plan to help them protect their herds from TB. Advice from the Government , farming experts, leading vets and agriculture colleges is now available on a single website [www.TBhub.co.uk](http://www.TBhub.co.uk)

A new bTB biosecurity five point action plan has also been launched <http://www.tbhub.co.uk/biosecurity/protect-your-herd-from-tb/>

The five recommended actions that all farmers are encouraged to take are to :

- Restrict contact between badgers and cattle
- Manage cattle feed and water
- Stop infected cattle entering the herd
- Reduce risks from neighbouring herds
- Minimise infection from cattle manure
